

## **TRIPOD - \$4500**

Our Tripod was developed to give surveyors an adjustable and extremely stable platform for subsurface scanning sonar and other equipment. With the removal of a single pin the tripod can be collapsed down for easy transport, and with our optional travel case, the tripod can be checked as luggage on any airline for rapid deployments. All the components of the tripod are type 3 hard anodized for a long corrosion free life. The tripod has a removable base allowing the equipment to be removed and reinstalled quickly and easily.

### **STANDARD FEATURES**

- Adjustable leg height
- Removable base plate
- Type 3 hard anodized

### **OPTIONS**

- Transport case
- Customizable mounting holes
