

DIGIBAR PROTECTION CAGE

Our protection cage for the Teledyne Digibar gives you that extra weight and protection needed for those high current and rocky locations. Our protection Cages gives you an extra 5Lbs. of weight to help keep your device from swaying in strong currents. We also manufacture extra weights that can be added to the bottom of the cage if needed. The cage itself and all hardware are made of 316 Stainless Steel and the clamps are machined from Acetel Delrin.

STANDARD FEATURES
